

# PVC WINDOW AND DOOR INSTALLATION GUIDE

## Handling and storage conditions

- Transport and store only in an upright position.
- The product must be placed on a flat surface to prevent injury and breakage.
- The product must be protected from precipitation, excessive moisture, dirt, paint and dust from building work.
- Do not drag or drop the windows

## Installation

1. Remove protection cover film on frame prior to facial board installation
2. Install facial boards to one side of the window as shown on Figure 1 (NB! Pre-drill screw holes)
3. Insert window into opening
  - 3.1. It is recommended to apply insulation material (rock-wool or self-expanding gasket) around the window
  - 3.2. Make sure the window is level
    - 3.2.1. If not use wedges to level the window
4. Install the facial boards from other side
