

# DOMESTIC ELECTRICAL INSTALLATION CERTIFICATE

Issued in accordance with British Standard BS 7671 - Requirements for Electrical Installations

Certificate Reference: 10060

## 1 DETAILS OF THE CLIENT

Client: Tuin LTD

Address: NR16 1ER

## 2 DETAILS AND EXTENT OF THE INSTALLATION

Installation Address: Tuin, Ashwelthorpe Industrial Estate, Norwich, Norfolk, NR16 1ER

Extent of the installation covered by this certificate: 100% of the Garden Office installation ONLY

The installation is: New  N/A  An addition  An alteration  N/A

## 3 COMMENTS ON EXISTING INSTALLATION

Excellent Condition

## 4 NEXT INSPECTION

I RECOMMEND that this installation is further inspected and tested after an interval of not more than: 10 Years

## 5 TEST INSTRUMENTS

Details of Test Instruments used (state serial and/or asset numbers):

|                        |                  |                             |                  |
|------------------------|------------------|-----------------------------|------------------|
| Multi-functional:      | Seaward 19C-0766 | Earth electrode resistance: | Seaward 19C-0766 |
| Insulation resistance: | Seaward 19C-0766 | Earth fault loop impedance: | Seaward 19C-0766 |
| Continuity:            | Seaward 19C-0766 | RCD:                        | Seaward 19C-0766 |

## 6 DESIGN, CONSTRUCTION, INSPECTION AND TESTING

I/We being the person(s) responsible for the design, construction, inspection and testing of the electrical installation (as indicated by my/our signatures below), particulars of which are described above, having exercised reasonable skill and care when carrying out the design, construction, inspection and testing, hereby CERTIFY that the design work for which I/we have been responsible is to the best of my/our knowledge and belief in accordance with BS 7671:2008, amended to 2011 except for the departures, if any, detailed as follows.

Details of departures from BS 7671 (Regulations 120.3 and 134.1.8):

None

The extent of liability of the signatory/signatories is limited to the work described above as the subject of this certificate.

**For the DESIGN, the CONSTRUCTION, and the INSPECTION AND TESTING of the installation:**

Name: Richard Position: Electrician Signature: Date: 06/08/2012

## 7 DETAILS OF THE ELECTRICAL CONTRACTOR

Trading Title: Electrical

Address: Ashwellthorpe Industrial Estate  
Norwich  
Norfolk

Registration Number (if applicable): Napit 17812

Telephone Number: 07721 522893

Postcode: NR16 1ER

| 8 SUPPLY CHARACTERISTICS AND EARTHING ARRANGEMENTS |                                     |  |                             | Characteristics of Primary Supply Overcurrent Protective Device(s) |                               |
|--|-------------------------------------|--|-----------------------------|--|-------------------------------|
| System Type(s)                                     | Number and Type of Live Conductors  |  | Nature of Supply Parameters |  |                               |
| TN-S   | N/A                                 | 1-phase (2 wire): <input checked="" type="checkbox"/>                | 1-phase (3 wire): N/A       | Nominal voltage(s): U: 240 V U <sub>o</sub> : 230 V                | BS(EN): 1361 Fuse HBC         |
| TN-C-S   | <input checked="" type="checkbox"/> | 3-phase (3 wire): N/A  | 3-phase (4 wire): N/A       | Nominal frequency, f: 50 Hz  | Type: 2                       |
| TT   | N/A                                 | Other: N/A   |                             | Prospective fault current, I <sub>pf</sub> : 1.09 kA               | Rated current: 100 A          |
|  |                                     | Confirmation of supply polarity: <input checked="" type="checkbox"/> |                             | External earth fault loop impedance, Z <sub>e</sub> : 0.21 Ω       | Short-circuit capacity: 33 kA |

| 9 PARTICULARS OF INSTALLATION AT THE ORIGIN |                                     |  |  |   |                                     |
|---|-------------------------------------|--|--|---|-------------------------------------|
| Means of Earthing                           |                                     | Details of Installation Earth Electrode (where applicable) |  |   |                                     |
| Distributor's facility:                     | <input checked="" type="checkbox"/> | Type:  | N/A  | Location:                                     | N/A                                 |
| Installation earth electrode:               | N/A                                 | Electrode resistance, R <sub>A</sub> :                     | N/A Ω                                      | Method of measurement:                        | N/A                                 |
| Maximum Demand (Load):                      | 80 Amps                             | Protective measure(s) against electric shock:              | ADS  | Measured Z <sub>e</sub> :                     | 0.28                                |
| Main Switch or Circuit-Breaker              |                                     |  | Earthing and Protective Bonding Conductors |   |                                     |
| Type  | 60947-2 MCB - B                     | Voltage rating:  | 240 V                                      | <b>Earthing conductor</b>                     |                                     |
| BS(EN):                                     |                                     | Rated current, I <sub>n</sub> :                            | 80 A                                       | Conductor material:                           | Copper                              |
| Number of poles:                            | 2                                   | RCD operating current:                                     | N/A mA                                     | Conductor csa:                                | 16 mm <sup>2</sup>                  |
| Supply conductors material:                 | Copper                              | RCD operating time:  | N/A ms                                     | <b>Main protective bonding conductors</b>     |                                     |
| Supply conductors csa:                      | 25 mm <sup>2</sup>                  |  |  | Conductor material:                           | Copper                              |
|   |                                     |  |  | Conductor csa:                                | 10 mm <sup>2</sup>                  |
|   |                                     |  |  | <b>Bonding of extraneous-conductive parts</b> |                                     |
|   |                                     |  |  | Water service:                                | <input checked="" type="checkbox"/> |
|   |                                     |  |  | Gas service:                                  | N/A                                 |
|   |                                     |  |  | Oil service:                                  | N/A                                 |
|   |                                     |  |  | Structural Steel:                             | N/A                                 |
|   |                                     |  |  | Other incoming service(s):                    |                                     |
|   |                                     |  |  | Continuity & connection verified:             | <input checked="" type="checkbox"/> |
|   |                                     |  |  | Continuity & connection verified:             | <input checked="" type="checkbox"/> |
|   |                                     |  |  | Lightning protection:                         | N/A                                 |

| 10 SCHEDULE OF ITEMS INSPECTED   |   |  |
|--|---|--|
| Methods of protection against electric shock   | Prevention of mutual detrimental influence  | Cables and conductors (Continued)  |
| <b>Basic and fault protection:</b>   | <input checked="" type="checkbox"/> Proximity of non-electrical services and other influences   | <input checked="" type="checkbox"/> Additional protection provided by 30mA RCD for cables in concealed walls (where required in premises not under the supervision of skilled or instructed persons) |
| <input checked="" type="checkbox"/> SELV   | <input checked="" type="checkbox"/> Segregation of Band I and Band II circuits or use of Band II insulation   | <input checked="" type="checkbox"/> Connection of conductors   |
| <b>Double or reinforced insulation:</b>  | <input checked="" type="checkbox"/> Segregation of safety circuits  | <input checked="" type="checkbox"/> Presence of fire barriers, suitable seals and protection against thermal effects   |
| N/A Double or Reinforced Insulation  | <b>Identification</b>   | <b>General</b>   |
| <b>Basic protection:</b>   | <input checked="" type="checkbox"/> Presence of diagrams, instructions, circuit charts and similar information  | <input checked="" type="checkbox"/> Presence and correct location of appropriate devices for isolation and switching   |
| <input checked="" type="checkbox"/> Insulation of live parts   | <input checked="" type="checkbox"/> Presence of danger notices  | <input checked="" type="checkbox"/> Adequacy of access to switchgear and other equipment   |
| <input checked="" type="checkbox"/> Barriers or enclosures   | <input checked="" type="checkbox"/> Presence of other warning notices, including presence of mixed wiring colours   | <input checked="" type="checkbox"/> Particular protective measures for special installations and locations   |
| <b>Fault protection:</b>   | <input checked="" type="checkbox"/> Labelling of protective devices, switches and terminals   | <input checked="" type="checkbox"/> Connection of single-pole devices for protection or switching in line conductors only  |
| <b>Automatic disconnection of supply</b>   | <input checked="" type="checkbox"/> Identification of conductors  | <input checked="" type="checkbox"/> Correct connection of accessories and equipment  |
| <input checked="" type="checkbox"/> Presence of earthing conductor   | <b>Cables and conductors</b>  | <input checked="" type="checkbox"/> Selection of equipment and protective measures appropriate to external influences  |
| <input checked="" type="checkbox"/> Presence of circuit protective conductors  | <input checked="" type="checkbox"/> Selection of conductors for current carrying capacity and voltage drop  | <input checked="" type="checkbox"/> Selection of appropriate functional switching devices  |
| <input checked="" type="checkbox"/> Presence of main protective bonding conductors   | <input checked="" type="checkbox"/> Erection methods  |  |
| <input checked="" type="checkbox"/> Choice and setting of protective and monitoring devices (for fault protection and/or overcurrent protection) | <input checked="" type="checkbox"/> Routing of cables in prescribed zones or within mechanical protection   |  |
| <b>Electrical Separation</b>   | <input checked="" type="checkbox"/> Cables incorporating earthed armour or sheath, or run within an earthed wiring system, or otherwise adequately protected against nails, screws and the like |  |
| <input checked="" type="checkbox"/> Provided for one item of current-using equipment   |   |  |
| <b>Additional protection:</b>  |   |  |
| <input checked="" type="checkbox"/> Presence of residual current device(s)   |   |  |
| <input checked="" type="checkbox"/> Presence of supplementary bonding conductors   |   |  |

| 11 SCHEDULE OF ITEMS TESTED   |   |   |
|---|---|---|
| <input checked="" type="checkbox"/> External earth fault loop impedance, Z <sub>e</sub>     | <input checked="" type="checkbox"/> Insulation resistance between live conductors           | N/A Verification of phase sequence  |
| <input checked="" type="checkbox"/> Installation earth electrode resistance, R <sub>A</sub> | <input checked="" type="checkbox"/> Insulation resistance between live conductors and earth | <input checked="" type="checkbox"/> Operation of residual current device(s) |
| <input checked="" type="checkbox"/> Continuity of protective conductors                     | <input checked="" type="checkbox"/> Polarity  | <input checked="" type="checkbox"/> Functional testing of assemblies        |
| <input checked="" type="checkbox"/> Continuity of ring final circuit conductors             | <input checked="" type="checkbox"/> Earth fault loop impedance, Z <sub>S</sub>              | <input checked="" type="checkbox"/> Verification of voltage drop            |

**12 SCHEDULE OF CIRCUIT DETAILS AND TEST RESULTS**

Designation of consumer unit: **D.B. 1** Location: **Garage** Prospective fault current: **1.09 kA** Type of Wiring O-Other: **N/A**

| Circuit number | Circuit designation | Type of wiring | Reference Method | Number of points served | Circuit conductors: csa |            | Max disconnect time $t_n$ permitted by BS7671 s | Overcurrent protective devices |         |          |             | RCD Maximum Zs permitted by BS7671 $\Omega$ | Circuit impedances (Ohms) |  |              |          |   | Insulation resistance (record lower or lowest value) |                     |                        |                        | RCD Operating times     |                                     |   |          |            |                                     |     |     |     |     |     |  |  |

This form is based on the model shown in Appendix 6 of BS 7671:2008 amended 2011.

# DOMESTIC ELECTRICAL INSTALLATION CERTIFICATE

## GUIDANCE FOR RECIPIENT (to be appended to the Certificate)

This safety Certificate has been issued to confirm that the electrical installation work to which it relates has been designed, constructed and inspected and tested in accordance with British Standard 7671 (as amended) (The IET Wiring Regulations).

You should have received an original Certificate and the contractor should have retained a duplicate Certificate. If you were the person ordering the work, but not the owner of the installation, you should pass this Certificate, or a full copy of it including the schedules, immediately to the user.

The 'original' Certificate should be retained in a safe place and be shown to any person inspecting or undertaking further work on the electrical installation in the future. If you later vacate the property, this Certificate will demonstrate to the new owner that the electrical installation complied with the requirements of British Standard 7671 at the time the certificate was issued. The Construction (Design and Management) Regulations require that for a project covered by those Regulations, a copy of this Certificate, together with schedules is included in the project health and safety documentation.

For safety reasons, the electrical installation will need to be inspected at appropriate intervals by a competent person. The maximum time interval recommended before the next inspection is stated on Page 1 under 'Next Inspection'.

This Certificate is intended to be issued only for a new electrical installation or new work associated with an alteration or addition to an existing installation. It should not have been issued for the inspection of an existing electrical installation. An 'Electrical Installation Condition Report' should be issued for such an inspection.

This Certificate is only valid if a Schedule of Inspections and Schedule of Test Results are appended.
